

# Mateus Bezerra

## Front-end Engineer

✉ dev@mateusbezerra.com

🌐 mateusbezerra.com

📍 Santana (AP) - Brazil

## Education

- **03/2016 - 03/2023 - Bachelor's Degree in Computer Science**, *Universidade Federal do Amapá*

## Awards

- **2019 - Campus Mobile**, *Instituto Claro and University of São Paulo*

I created the SafeGirl app, the best mobile application in the diversity category, as the only engineer on my team, I was responsible for building every piece of the solution, web app, mobile app, and backend service. As the winner, I could have a seven-day trip to Silicon Valley and visit all the major tech companies in the world (Facebook, Google, LinkedIn, Twitter and more). [more info here](#)

## Work History

- **10/2021 - Current - Front-end Engineer Jr**, *Toptal (Core team) - Remote, USA*

I've been working on the client and staff portals of the company's platform, introducing new features, fixing bugs, and suggesting improvements. My code has to follow the Product Manager's requirements and the Figma design file. My position also requires me to estimate tickets and discuss technical debits. My team is fully remote and distributed between Europe, North America, and South America.

Stack: React, Typescript, Styled Components, Sass, Apollo GraphQL, Cypress, Jest, Ruby on Rails

- **09/2020 - 09/2021 - Front-end Developer**, *Softvaro - Remote, Brazil*

I was part of the redesign team for a millage website, responsible for migrating the old web app from Liferay monolithic app to a micro-frontend architecture. I worked directly on building the new search component engine and on the integration of the login page with Auth0.

Stack: React, Single-SPA, Reactstrap, Sass, Storybook, Jest

- **01/2020 - 09/2020 - Full Stack Developer**, *Bemind - Remote, Brazil*

As a software consultancy company, I worked on multiple projects, most of them were about mobile apps for iOS and Android, but I also worked on building a website for buying tickets using NextJS, including a queue microservice built with NodeJS and MongoDB.

Stack: React, Redux, React Native, Styled Components, Redux, React Native Paper, GraphQL, NextJS, NodeJS, Express, Postgres, MongoDB.

- **03/2019 - 02/2020 - Junior Mobile Developer**, *PRODAP - Macapá - Brazil*

As a mobile developer, I was responsible for adding new features, fixing bugs, and publishing it on the Play Store and Apple Store. For some projects, I also worked on building a REST API with Lumen PHP and Postgres and building some web pages with React as well.

Stack: React Native, React, Laravel/Lumen PHP, Postgres, Redux, Styled Components, NextJS.

- **03/2016 - 02/2019 - Freelancing**

Worked on building web and mobile applications.

Stack: Javascript, React Native, Laravel PHP, JQuery, PhoneGap, Cordova, JQuery
